

# I Support New Jobs and Long-Term Economic Opportunity in Medina County

I support The Medina Line, which will serve as a catalyst for new jobs and long-term economic opportunity for Medina County and the surrounding region, for the following reasons:

- The Medina Line will create approximately 200 construction, engineering and operations jobs.
- The Medina Line will generate new tax revenues for vital government services, including road construction and maintenance, schools, and public safety.
- As a common carrier railroad, The Medina Line provides local businesses with a low-cost and convenient connection to the regional, national, and global marketplace, which will support new jobs through businesses that locate on or near the line.
- Southwest Gulf Railroad is committed to building and operating The Medina Line in an environmentally responsible manner in strict accordance with Federal Railroad Administration standards.
